DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to an isolated peptide of HCV protein comprising an antigen epitope, classified in class 530, subclass 300.
- II. Claims 7-10, drawn to a mosaic polypeptide comprising one or more antigen epitope, classified in 424, subclass 192.1.
- III. Claims 14-22, drawn to an assay for detecting HCV in a biological sample comprising HCV antigen epitope, classified in class 436, subclass in 517.

If any one of Group I-III is elected, applicant is required to further one single amino acid sequences from SEQ ID Nos. 1-5 to be examined on the merit. This is not species election since each sequence encoded structurally different proteins, which produce different effects.

- IV. Claims 23-25, drawn to an immunogenic composition comprising HCV non-structural protein.

If Group IV is elected; applicant is required to further elect one of HCV protein to be examined on the merit. This is not species election since each sequence encoded structurally different proteins, which produce different effects.

The proteins are required to be selected from the following:

- 1). The HCV core protein,
- 2). The HCV NS3 protein,
- 3). The HCV NS5 protein.

The inventions are distinct, each from the other because:

Inventions of group I-II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to structural and functional different products, e.g. the product of Group I is a peptide, whereas the product of the group IV is an immunogenic composition.

Inventions I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product

as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with material different product ,e.g. a monoclonal antibody against HCV non-structural protein(s).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
